Confirmation

Bio-degradable confirm to DIN-ISO 14851/14852 for bioFila® silk

We can confirm that the material bioFila® silk was successful tested in line with the standard DIN-ISO 14851/14852.

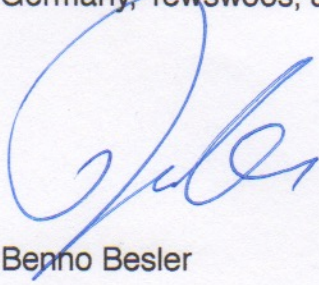

Therefore the material was tested for 140 days in line the the standard procedures above.

After 100 days the material was reduced by 14% and after 140 days by 46%. Based on this results a 100% degradation can be expected after 1 year.

The material bioFila® silk is bio-degradable und has a degradation comparable with wood.

The test was made by an independent laboratory in 2011.
